

REMARKS

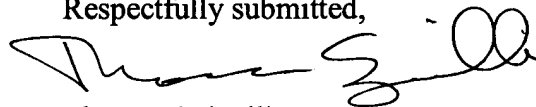

It is respectfully requested that this Preliminary Amendment be entered in the above-identified application prior to examination.

By means of the present Preliminary Amendment, the specification has been amended to improve its form and readability. The amendments to the specification are fully supported in the original disclosure, particularly in the Figures. Therefore, no new matter has been entered into the disclosure by way of the present amendment to the specification.

Furthermore, by means of the present Preliminary Amendment, the Drawings have been amended to be consistent with the specification. Specifically, Figure 7 has been amended to move the location of reference numeral 73 and the bracket corresponding thereto to refer to the entire contents of Figure 7. Figure 7 has also been amended to revise the cross-hatching to more accurately reflect the described invention. Those of ordinary skill in the art would appreciate and understand the changes to Figure 7 from a reading of the specification, including the Figures. Therefore, no new matter has been entered into the disclosure by way of the amendment to Figure 7. A clean copy of Amended Figure 7 is enclosed.

In view of the above, early and favorable consideration are respectfully requested.

Respectfully submitted,

Thomas Spinelli
